

Capacity & Scheduling

The three arenas that decide whether a referral becomes a delivered visit, and the primary variables inside each.

THE ENVELOPE

Capacity Management

How much work this branch can deliver.

01

Staff supply by discipline & role

02

Assessing capacity — SOC-capable

03

Availability & time off

04

Territory reachability

05

Per-diem & flex buffer

06

On-call & weekend rotation

07

Visit weighting — the point currency

08

Targets & ceiling

09

Committed load & open room

10

Specialty competency & ramp

22 variables in full

COORDINATION

FILLING THE ENVELOPE

Scheduling Engine

Which clinician, which day, which route.

01

Ordered demand

02

Authorization & payer rules

03

Order & consent readiness

04

Compliance windows

05

Assignment fit

06

Clinician restrictions

07

Patient & caregiver availability

08

Clinical timing

09

Missed-visit exceptions

10

Routing & geography

11

Patient & clinician preference

12

Week distribution & continuity

47 variables in full

MAKING IT HAPPEN

Patient Engagement

Turning a schedule into delivered visits.

01

Availability confirmation before booking

02

Call-out coverage

03

Failed-visit follow-up & rebooking

04

Day-before confirmation

05

Automated reminders

06

En-route notification

07

New-patient welcome call

08

Reschedule coordination

12 variables in full

Capacity sets the envelope; scheduling and engagement are both performed against it.

Variables and grouping from the 8.13 Compassus Capacity & Scheduling Workbook. Module names per DE-02, 13 Aug 2026.
