

Vendor Scorecard

How we score each returned questionnaire. The rows are the questionnaire's own questions, in the order they appear on it. Seven marks a vendor, about two minutes each.

WHAT WE SCORE		
A1	Home Care Home Base integration	20
Section B	Capacity	12
Section B	Scheduling	12
Section B	Engagement	12
C1–C5, C7	Sophistication	20
D1–D3	Clinician fit	12
E1–E4	Partnership	12
Total		100

HOW WE MARK IT

Home Care Home Base A1	Scope Section B	Clinician fit D1–D3
20 Live, established customer base	5 Most of it	4 Strong fit
16 Live, small customer base	4 More than half	3 Good fit
12 Live through a partner	3 About half	2 Workable
6 In development, with a date	2 Less than half	1 Poor fit
2 On the roadmap, no date	1 A corner of it	0 Not answered
0 None, and no path	0 Nothing here	
	Sophistication C1–C5, C7	Partnership E1–E4
	4 Runs it — decides across the whole picture	4 Specific terms and a change-management story
	3 Recommends it — proposes; a person confirms	3 One of the two
	2 Checks it — applies rules, flags problems	2 Willing, no structure offered
	1 Shows it — surfaces the information only	1 Standard commercial relationship
	0 Not addressed	0 Not answered

FLAGS, BANDS

A2	Customers, scale and references	80–100	Advance
A3	Measured impact	65–79	Consider
C6	What happens when their product is down	50–64	Hold
		Under 50	Decline

These three raise a flag rather than moving the score. A vendor can score well and still carry one. We resolve it before advancing rather than trading it against points.

Two scales are deliberately left undescribed. Clinician fit is our own read — we know how our clinicians work and what they will accept. And most of it is the ceiling on scope, because the spec is ours and original; nobody covers all of it.

A vendor whose Home Care Home Base integration is not yet live shows as Conditional whatever the total.
