

CareStitch on the Compassus Episode

Where CareStitch would sit in our flow as demoed on 23 Sep 2026, and where automation is live, beta, roadmap or still open

AUTOMATION

TRIGGER

DATA IN

WHERE IT BREAKS

- Intake

Insurance & Auth

PCC / Scheduler

Clinician

Patient

Branch Leadership

HCHB

CareStitch

WHERE AUTOMATION IS POSSIBLE

IN CARESTITCH TODAY IN CARESTITCH TODAY

- Eligibility filtering by region and properties (B)
- Open points by clinician and day, on a map (A)
- Staffing requests to priority groups (B, E)
- Click-to-call with automatic call log (D)
- Care-team chat created per patient (E)
- Central route optimization (D)

BETA BETA

- HCHB read by screen automation (C)
- No write-back of any kind

ROADMAP ROADMAP, NO DATE

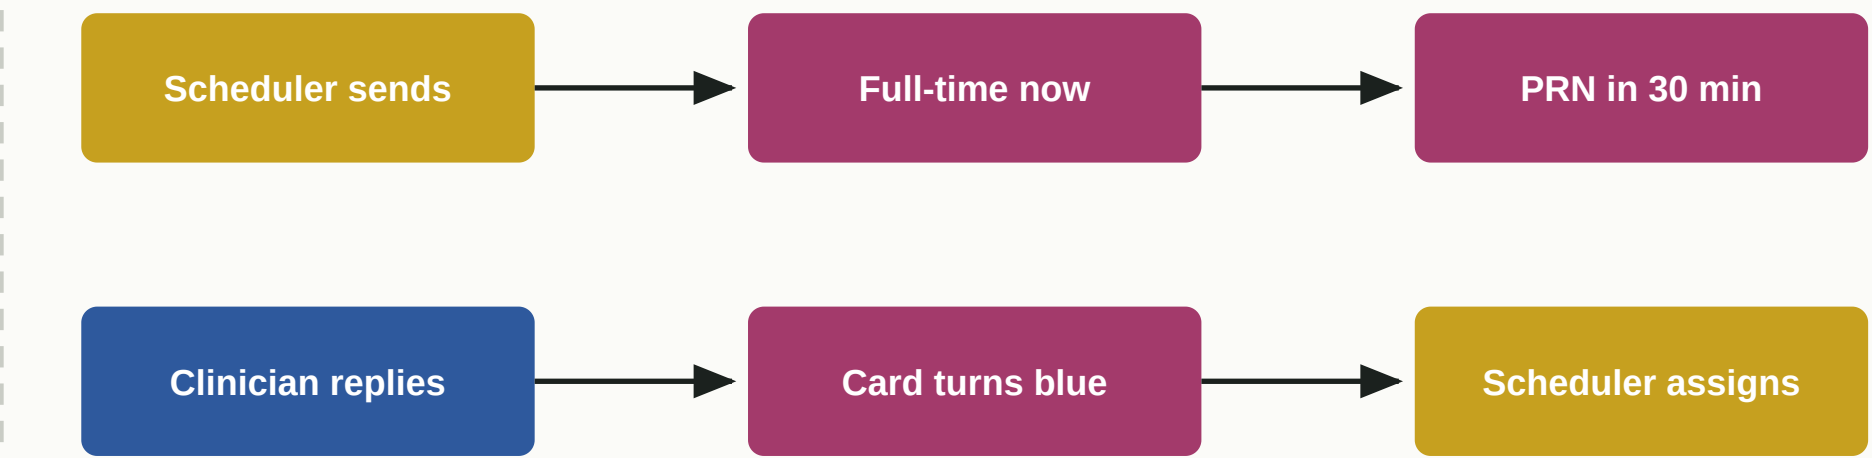

- Patient confirmation by text (D)
- Scheduling recommendation engine (B)
- LUPA and episode guardrails (C)
- API for other systems (A)

OPPORTUNITY OPEN OPPORTUNITIES FOR COMPASSUS

- Capacity query from the intake platform (A)
- Plan-of-care orders fill the tasks (A, C)
- Agentic two-way patient scheduling (D)
- Suggested cover for a call-out (E)
- Scheduler productivity reporting

Everything is visible and nothing is decided.
The automation layer is still in research.

THE STAFFING REQUEST — THE STANDOUT

Replaces the Teams, email and text scramble. Every send, read and reply is logged, giving response-time and accept-rate data by clinician that Compassus does not have today.
