

VitalisCare Sync on the Compassus Episode

Where Sync would sit in our flow as demoed on 24 Sep 2026, and where automation is live, promised or still open

AUTOMATION

TRIGGER

DATA IN

WHERE IT BREAKS

- Intake

Patient
- Insurance & Auth

Branch Leadership
- PCC / Scheduler

HCHB
- Clinician

VitalisCare Sync

IN SYNC TODAY

demonstrated in software

VITALIS ROADMAP

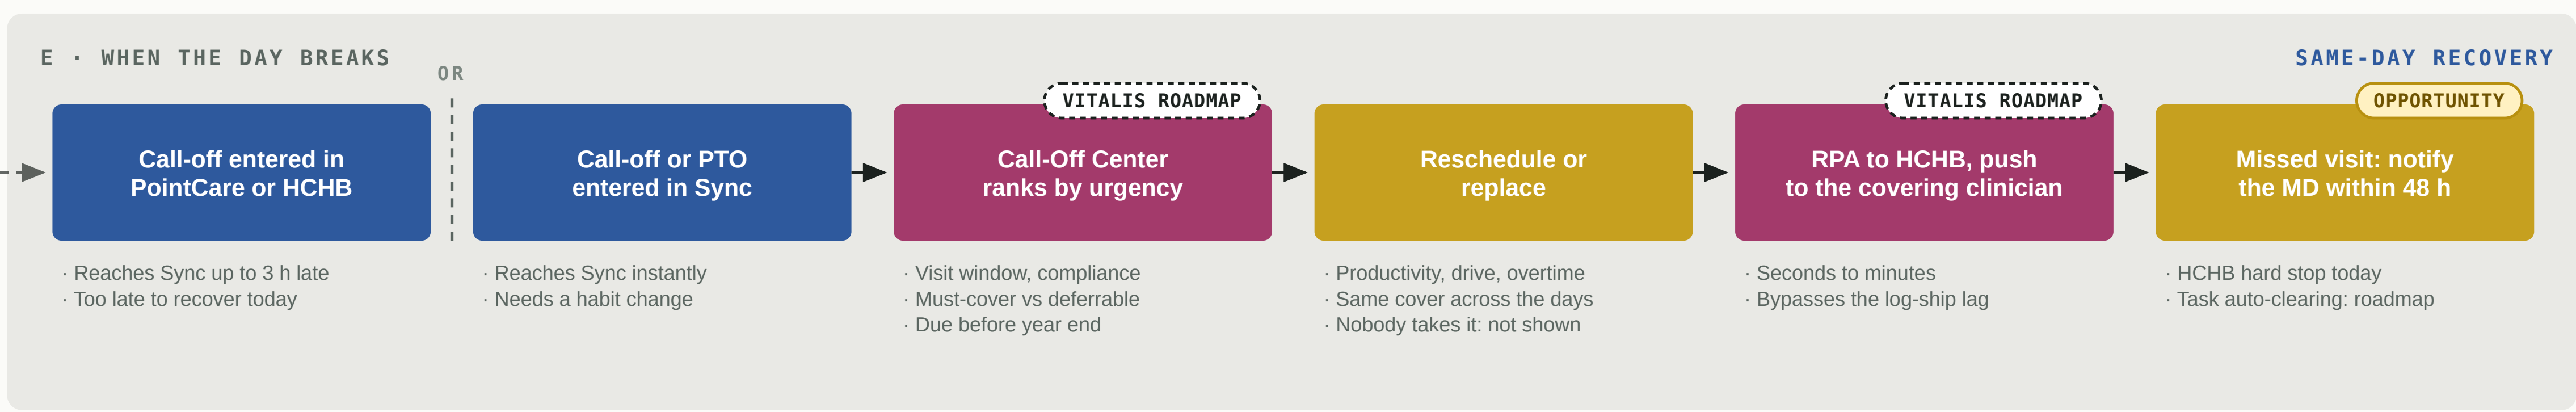

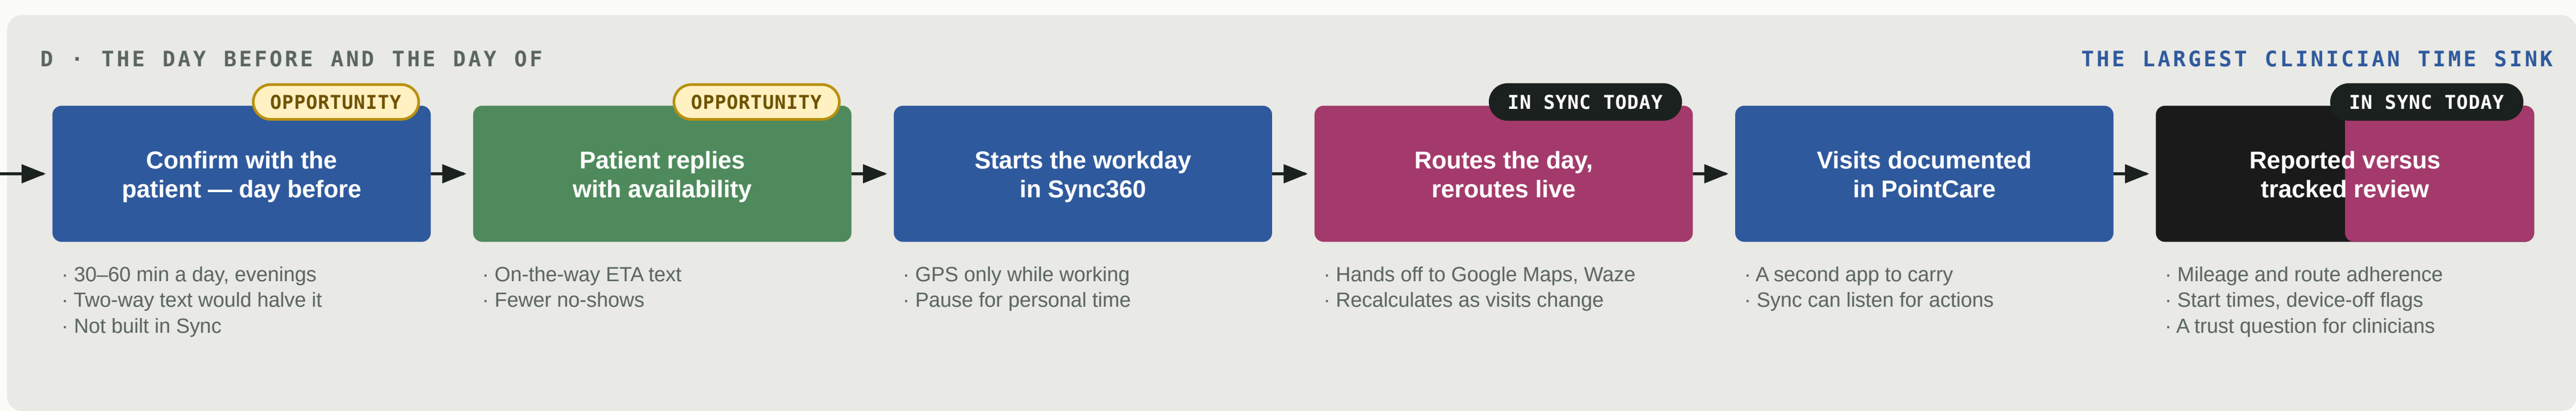

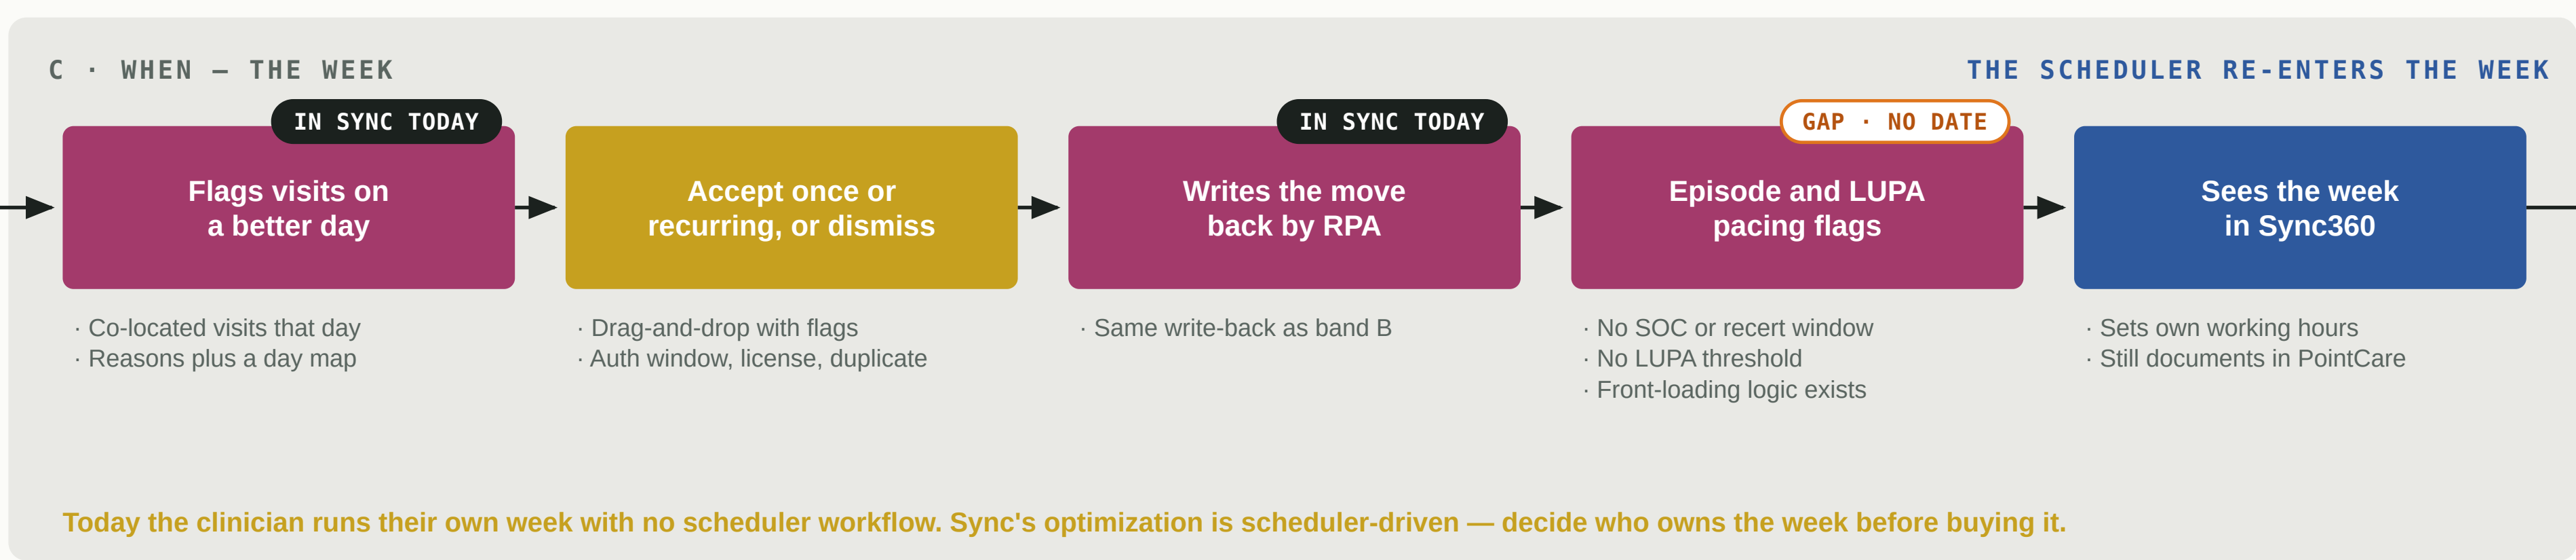

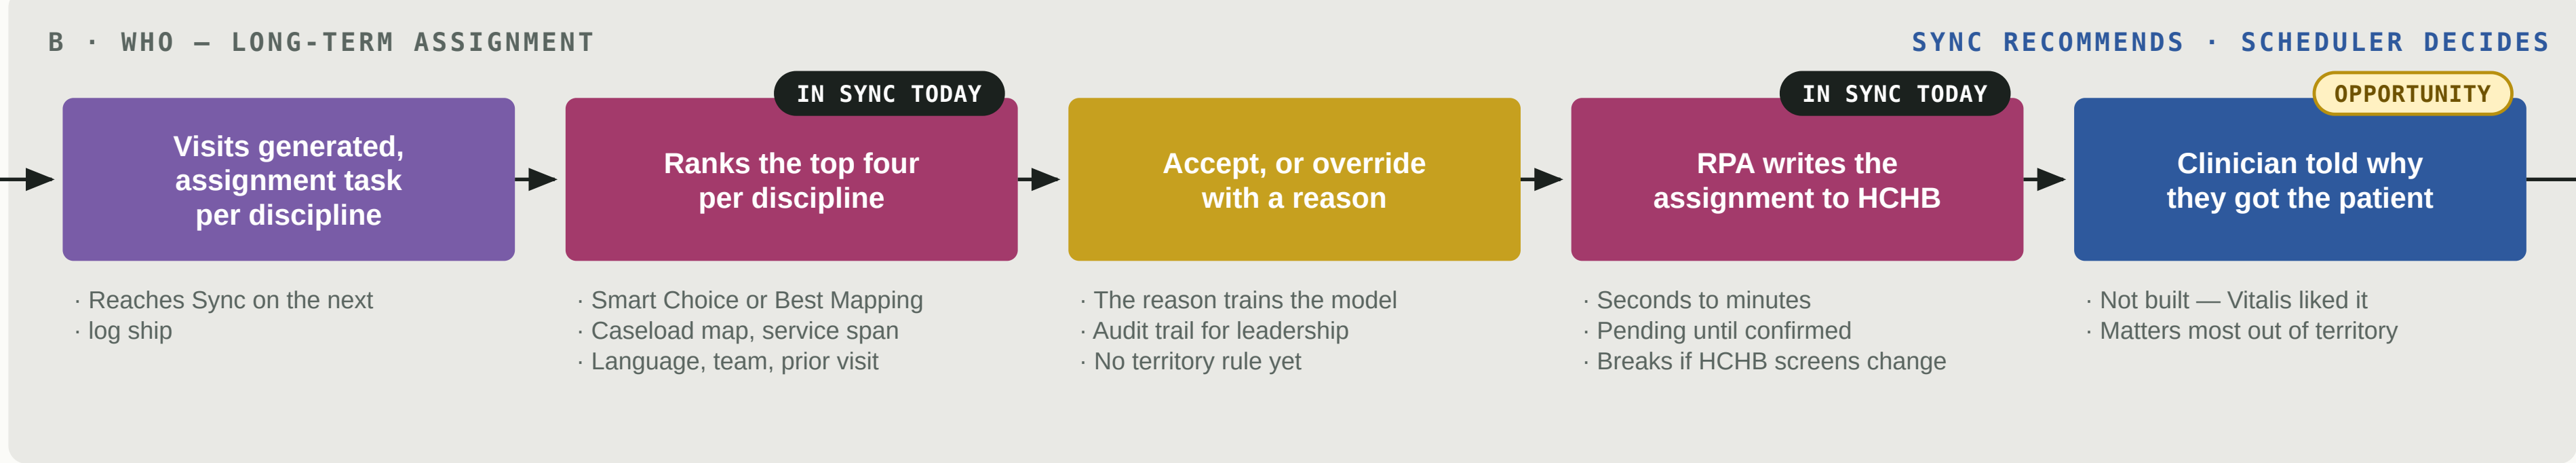

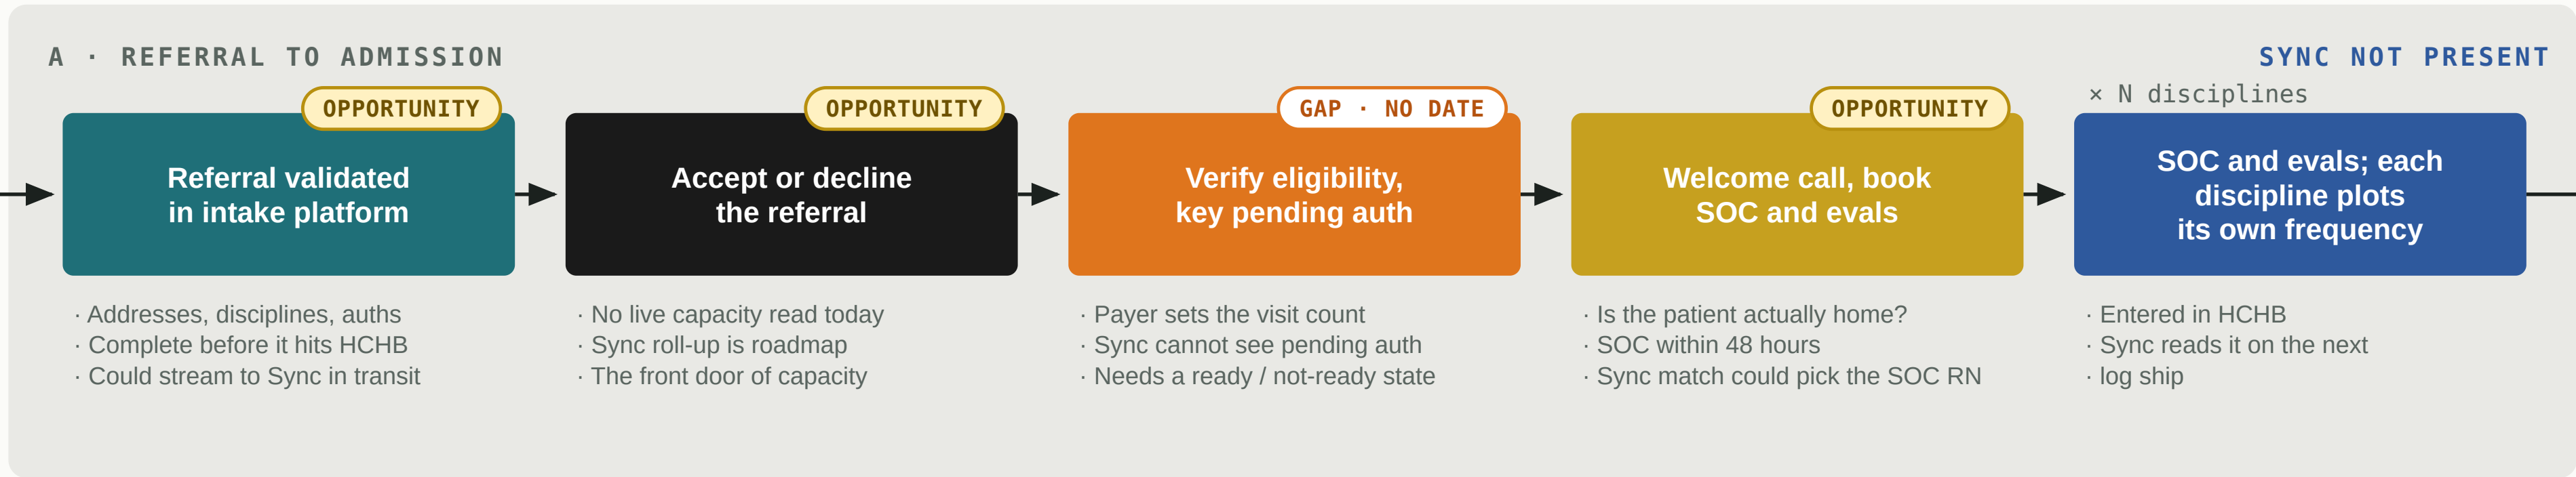

in design, dated or promised

GAP · NO DATE

Vitalis named the gap, no date

OPPORTUNITY

not on their roadmap · ours to push

WHERE AUTOMATION IS POSSIBLE

IN SYNC TODAY AUTOMATED IN SYNC TODAY

- Ranked provider matches per discipline (B)
- RPA write-back of assignments and moves (B, C)
- Better-day suggestions with reasons (C)
- Licence and certification alerts (C)
- Live routing and rerouting of the day (D)
- Reported-versus-tracked visit review (D)
- PTO pulled from the HR system (I solved)

VITALIS ROADMAP ON THE VITALIS ROADMAP

- Call-Off Center — before year end (E)
- Auto-clearing HCHB scheduler tasks — weeks
- Enterprise capacity roll-up by branch
- Plotting visits into HCHB by write-back

GAP · NO DATE GAPS VITALIS NAMED, NO DATE

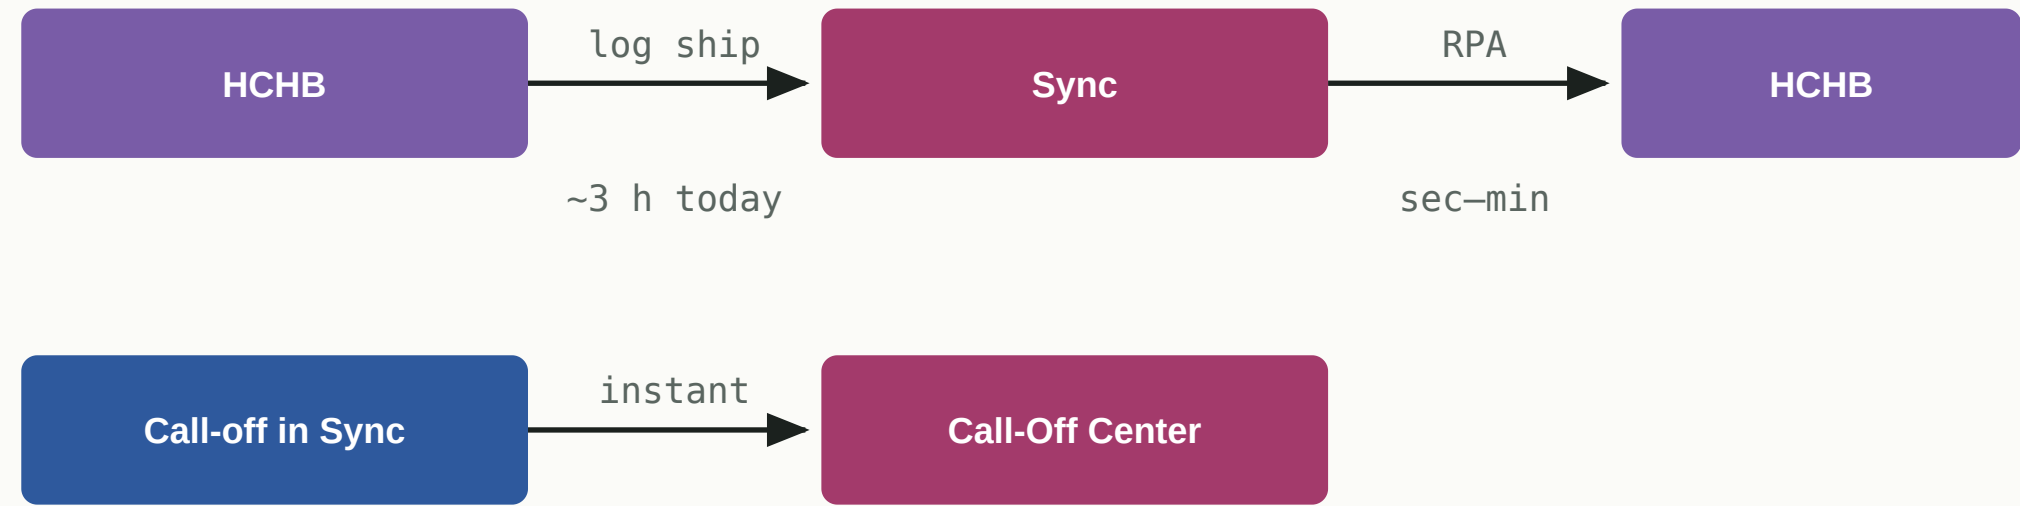

- Authorization and readiness as states (A)
- Episode, LUPA and recert pacing (C)
- Therapy productivity and sequencing
- Patient communication of any kind (D)

OPPORTUNITY OPEN OPPORTUNITIES FOR COMPASSUS

- Accept or decline referrals on live capacity (A)
- Stream intake data to Sync, skip the log ship (A)
- Sync picks the SOC clinician, not just long-term (A)
- Tell the clinician why they got a patient (B)
- Two-way day-before confirmation and ETA text (D)
- Territory map that follows referral patterns
- Missed-visit MD notification chain (E)
- Faster HCHB data: subset script or DB mirror

The largest clinician time back is band D, and nobody has built it yet.

THE DATA PATH — WHY BAND E NEEDS SYNC

A call-off entered in PointCare or HCHB waits for the next log ship. Entered in Sync, it skips it — so the habit change is the fix, until Compassus speeds up the HCHB feed.
