Vendor Profiles: VitalisCare, Arya Health, Axle Health

Partner due diligence — prepared October 2026

Scope and method

- Public-source research on three home health / hospice software vendors as potential product-build partners.
- Sources: company websites, press releases, SEC EDGAR, trade press (Home Health Care News, Hospice News, HomeCare Magazine), Y Combinator, aggregators.
- Crunchbase, PitchBook, Tracxn and LinkedIn blocked access; figures from those sites come from search snippets only.
- No court-records (PACER) search was run.
- Labels: **Confirmed** = stated in a cited source. **Vendor claim** = company's own marketing, not independently verified. **Estimated** = aggregator figure, inference, or conflicting sources. **Not found** = searched, not located.

Summary comparison

	VitalisCare	Arya Health	Axle Health
Website	vitaliscare.ai	aryahealth.ai (app: app.aryaworks.com)	axlehealth.com
Legal entity	VitalisCare Ltd., Jerusalem, Israel (Confirmed). US entity: Not found	Possibly "Arya, LLC" (Estimated)	Possibly "Axle Health, Inc." (Estimated)
HQ	Jerusalem (legal address); parent studio in Lakewood, NJ (Estimated)	New York City	Santa Monica / Los Angeles
Founded	~2024–25 (Estimated); parent studio ~2020	~2022 (Estimated)	2020 (Confirmed)
CEO	Dr. Dina Yankelewitz	Kunal Sarda	Adam Stansell
Headcount	11–50 (Estimated)	Not disclosed	~25–28, flat (Estimated)
Total funding	None disclosed	~$25M (Confirmed)	~$14.4M disclosed; aggregators $14.3M–$16.8M
Last round	None found	$18.2M Series A, Oct 2025, led by ACME Capital	$10M Series A, May 2025, led by F-Prime
Revenue	Not disclosed; parent studio ~$1M (Estimated, low confidence)	Not disclosed; claims >6x growth to Oct 2025	Not disclosed; claims >$1M ARR within 12 months of 2023 launch, ~10x growth FY2024
Care segments	Hospice only	Home health, home care, hospice, pediatrics, private duty	Home health, health systems, pediatrics, value-based care, other field care
Product type	7 hospice AI apps	AI agent with 8 administrative skills	Scheduling, routing, dispatch, patient engagement, APIs
HCHB integration	Named; claims "fully integrated" (Vendor claim)	None named	HCHB appears in a customer testimonial; depth unknown
Other EMRs named	None	None	Epic, athenahealth, WellSky, Netsmart, Statewise
Public API	Not found	Not found	Yes (developers.axlehealth.com)
Security	HIPAA, SOC 2 Type II (Vendor claim; no report linked)	SOC 2 Type I & II, HIPAA, pen tests, Trust Center (Vendor claim)	SOC 2 Type II, HIPAA, pen tests, SSO/SAML, trust portal (Vendor claim)

	VitalisCare	Arya Health	Axle Health
HITRUST	Not found	Not found	Not found
Named customers	Moments Hospice, Anchor Hospice	TheKey, Team Select Home Care, Thrive Skilled Pediatric Care, Connect Pediatrics	Cityblock Health, Penn Medicine, Imagine Pediatrics, Grand Care
Pricing	Per patient census; no setup fee; auto-renew	Not disclosed; integration billed separately (Estimated)	Based on estimated customer savings

Common facts across all three

- All sell software that sits on top of the EMR. None replaces Homecare Homebase.
- None names a large Medicare-certified hospice or home health chain as a customer.
- Performance results are almost entirely self-reported.
- Each has a name-collision or legal-entity question that must be resolved before a BAA or contract.

VitalisCare

Identity and structure

- Brand: Vitalis Care. Website: vitaliscare.ai.
- Legal entity per privacy policy (updated March 24, 2025): **VitalisCare Ltd.**, Divrei Khayim 14, Jerusalem, Israel. No US state of incorporation listed. (Privacy Policy)
- Portfolio company of **Integralytic**, a healthtech venture studio. Integralytic builds products, then raises funding after an MVP. (Integralytic)
- Integralytic's other companies: DolphinCare (SNF MDS/reimbursement), 1Dose, Exclugo.
- Integralytic location: Lakewood, NJ; founded ~2020 (Estimated, directory sites).
- No US subsidiary, Israeli registration number, or formal Ltd.–studio relationship found.

Name collisions ruled out

- Vitalis Care (France) — Marseille home care provider; owns the "vitalis-care" LinkedIn page.
- VitalCaring Group — US home health/hospice operator, not a vendor.
- Vitalis Health and Home Care — Australian care provider.
- Vali Health — separate home care AI startup ($6M raised).
- Other "Vitalis" records on PitchBook/Tracxn — different companies; their funding data does not apply.

History

Date	Event
~2020	Integralytic founded (Estimated)
~2024–25	Vitalis Care launched
Jul 16, 2025	CEO on Husch Blackwell hospice AI podcast; said company started with scheduling, compliance and reimbursement
Aug 19, 2026	Nominated for Hospice News Product of the Year (community vote). Press release says company "began as a single end-of-life prediction tool"; now seven apps. Outcome of award: Not found

- Observation: the two accounts of which product came first conflict.

Leadership

- **Dr. Dina Yankelewitz** — founder and CEO. Doctorate in mathematics education; former professor; prior work at Pearson; data analytics/AI. Also founder of Integralytic and CEO of 1Dose (Estimated).
- No hospice operator or EHR vendor background disclosed.
- CTO, clinical lead, board, advisors: Not found. Product pages say built with "hospice clinical leaders, medical directors, and HCHB operations experts" — none named.

Size and financials

- Headcount: Crunchbase 11–50 (Estimated). Integralytic: ZoomInfo 1–10; RocketReach 41; Integralytic self-claims "150+".
- Funding rounds, investors, valuation, grants: Not found.
- SEC EDGAR: zero Form D filings for "Vitalis Care." An Israeli Ltd. could raise capital without a US filing.
- Revenue: Integralytic ~$1M (Estimated, low confidence).

Products (7 apps, 4 suites)

Suite	App	Function	Claims
Care	**Vantage**	Flags patients likely to die within 7–10 days; refreshes every 10 minutes	94% accuracy vs ~67% "typical EMR tools" (no source); "50+ billion clinical signals"; "fully integrated" with HCHB
Care	**Ray**	HOPE assessment timeline tracking; flags missed SFVs and overdue HUVs	Anchor Hospice: 97–99% HOPE compliance, ~1.5 hrs saved per morning
Coordination	**Sync**	AI visit scheduling with human approval; includes original HCHB schedule view	Homepage: 55–65% less drive time. Sync page: ~30%. Inconsistent
Coordination	**Sync360**	Field staff app; GPS mileage tracking; mileage fraud detection	—
Compliance	**Align**	Scans documentation for compliance gaps	"Prevents up to 90% of audit denials"
Compliance	**Guide**	Bedside documentation prompts; voice-to-text	—
Collaboration	**Bridge**	Hospice–SNF room-and-board reconciliation dashboard	Payment turnaround 30–60 days → 6–14 days

- No home health product.
- No EMR named other than HCHB. No public API.
- Pricing: per patient census, no setup fees, auto-renewing.

Customers

- **Moments Hospice** — Director of HCHB Operations quoted on homepage.
- **Anchor Hospice** — Ray case study.
- Other testimonials use initials only. No customer count or census figures published.

Security

- Claims HIPAA and SOC 2 Type II. No report or trust center linked.
- HITRUST, ONC certification, hosting region, subprocessor list: Not found.

Observations

- Closest functional match to Compassus hospice operations on HCHB.
- Least corporate transparency of the three: foreign legal entity, no disclosed funding, one named executive who also runs other portfolio companies.
- Possible PHI access from Israel; not addressed publicly.
- Studio model creates IP-ownership risk if products are spun into new companies.
- Headline accuracy and savings figures are unsourced or inconsistent.

Arya Health

Identity and structure

- Brand: “Arya.” Websites: aryahealth.ai; app at app.aryaworks.com. New York City.
- Builds AI agents for administrative work at home health, home care and hospice providers. (PR Newswire)
- Founded ~2022 (Estimated). Named after founder’s daughter.
- Legal entity: possibly “Arya, LLC” (Estimated, from seed-round listing). A priced Series A normally requires a C-corp, so the current entity may differ.
- No SEC Form D found for Arya’s own entity. Not a Y Combinator company.

Name collisions ruled out

- **Yuvo, Inc.** (CIK 0001907652) — unrelated Delaware company in NYC whose SEC filings list its former name as **“Arya Health, Incorporated.”** CEO Cesar Herrera. Form Ds: $8.17M (2024), $4.26M (2026). **These filings are not Arya’s.** Highest-risk collision in this report.
- ARYA Sciences SPACs and other “Arya” EDGAR filers.
- Arya.ag (India, agriculture); Arya Home Healthcare LLC (Virginia care provider); Arya by Leoforce (recruiting AI); Arya.ai (banking AI).
- “Arya, Philadelphia” on VCBacked — same investors as Arya Health’s seed; probably a duplicate record with wrong city.

History

Date	Event
~2022	Founded (Estimated)
Sep 2024	$4M seed; positioned as “healthcare workforce automation platform” (scheduling, payroll, onboarding, compliance)
Oct 29, 2025	$18.2M Series A; repositioned as AI “system of action”; Intake Agent announced with design partners
Jan 2026	Launched free Emergency Response Agent nationwide
Apr 2026	Connect Pediatrics results published
2026	MedTech Breakthrough Award

Leadership

- **Kunal Sarda** — CEO and co-founder (Confirmed). Per aggregators: co-founded VerbalizeIt (appeared on Shark Tank; acquired by Smartling 2016); Smartling through 2020; Wharton MBA (Estimated).
- “Arunram Kalaiselvan” listed as co-founder by one aggregator only; uncorroborated.
- **Melinda Phillips** — leads Care@Home Center of Excellence; former CEO of Thrive Skilled Pediatric Care (acquired by Aveanna).
- CTO, full executive team, board: Not found. ACME partner Aike Ho (Series A lead) is a likely board member — not confirmed.

Size and financials

- Headcount: Not disclosed.
- Open roles (Oct 2026), all in-person NYC: enterprise customer success lead, principal platform engineer, deployment specialist.

Round	Date	Amount	Investors	Status
Pre-seed / angel	Before 2024	~$2.8M (implied)	Likely Ridge, Oceans	Estimated
Seed	Sep 2024	$4.0M	Twelve Below (lead), Nebular, Oceans, Ridge; VCBacked also lists f7 Ventures, Operator Partners	Confirmed (additions Estimated)

Round	Date	Amount	Investors	Status
Series A	Oct 29, 2025	$18.2M	ACME Capital (lead), Ridge, Twelve Below, OpenAI executives, unnamed “leading post-acute care providers”	Confirmed
Total		**~$25M**		Confirmed

- Revenue: Not disclosed. Claims >6x growth in 12 months to Oct 2025, “pacing toward 10x.”
- Valuation: Not found.
- Some Series A investors are post-acute providers — possibly Compassus competitors.

Products

“One Agent with eight skills”:

Skill	Function	Claims
Scheduling	Shift/visit scheduling and fill	Connect Pediatrics: +25% scheduler capacity, no added headcount
Compliance	License/credential tracking	Deploys in under a week
Talent	Recruiting	60% less recruiting effort
Onboarding	New-hire onboarding	50% faster time-to-first-staffing; 70% less admin work
Intake	Referral intake	Newer; launched with design partners
Payroll	Payroll support	—
Engagement	Caregiver/patient outreach	—
Front Desk	Inbound calls and messages	Newer

- Plus a free **Emergency Response Agent**: local number per location, triages after-hours calls/texts, escalates to on-call staff; no access to detailed medical histories.
- Modes: co-pilot or autopilot. Channels: text, voice, email. Audit trails.
- Integration: claims read/write to “EMRs, ATS, HRIS in near-real time” — **names no EMR**. One aggregator reports “no verified bidirectional EHR connection.”
- Underlying tech (aggregator, Estimated): Google Gemini; earlier Anthropic Claude via AWS Bedrock. Subprocessors: Supabase, Cloudflare, Bland AI (voice), n8n.
- No clinical documentation, OASIS, coding, or hospice-specific workflows (IDG, HOPE, bereavement).

Customers

- TheKey, Team Select Home Care, Thrive Skilled Pediatric Care, Connect Pediatrics.
- No Medicare-certified hospice or home health customer named.

Security and contract terms

- Claims SOC 2 Type I and II, HIPAA, annual pen tests, Trust Center. BAAs offered; SOC 2 report under NDA (aggregator).
- Reported terms (Estimated): 30-day auto-renewal notice; 60-day notice for price increases; integration work billed separately.

Observations

- Best funded and best documented of the three.
- Product is administrative only; furthest from Compassus clinical and HCHB workflows.
- Integration with HCHB, or any named EMR, is unproven publicly.
- Customer base skews to home care and pediatrics.
- Yuvo/“Arya Health, Incorporated” collision must be cleared in writing before contracting.

Axle Health

Identity and structure

- Axle Health, axlehealth.com. Santa Monica / Los Angeles. Founded 2020. Y Combinator Winter 2021. (YC)
- Law firm: Gunderson Dettmer.
- Legal name "Axle Health, Inc." appears only on a third-party listing (Estimated). No Form D under "Axle Health" — likely files under a different legal name.
- Website footer misspells name as "Axle Heath."

Name collisions ruled out

- Axle (open-insurance API company); Axle (bank corporate-access software); "Axel Health" on CB Insights.

History

Date	Event
2020	Founded
2020–21	Services business: own phlebotomists, MAs and nurses doing in-home COVID testing for telehealth companies; largest partner Sameday Health
2021–22	Expanded to 50-state in-home visit network; "a couple million dollars" revenue
Winter 2021	Y Combinator
2023	Shut down services business; began selling internal scheduling/dispatch tool as SaaS
~2024	Passed $1M ARR within 12 months of software launch (secondary source)
Feb 2024	$4.2M seed
May 22, 2025	$10M Series A

Leadership

- **Adam Stansell** — founder and CEO. Prior: Uber Eats, Motive, consulting, investment banking. Columbia BA, Economics-Math.
- **Connor Hailey** — co-founder per third-party source (prior: ZocDoc, Uber). Not on YC page; current status unknown.
- Neither founder has clinical training.
- CTO, clinical leadership, board: Not found.
- F-Prime venture partner Julia McDowell quoted on Series A.

Size and financials

- Headcount ~25–28 (Estimated); Simplify shows -3% over two years.
- Hiring Senior Software Engineer, Interoperability ($170–200K) — EHR integration still being built.

Round	Date	Amount	Investors	Status
Pre-seed	~2020–21	~$0.2M	Y Combinator and others	Estimated
Seed	Feb 2024	$4.2M (total to date $4.4M)	Press release: "led by Pear VC, with an additional round led by TRAC VC." One secondary source names TRAC as lead and cites $7M	Confirmed; conflicting secondary
Series A	May 22, 2025	$10M	F-Prime (lead), Y Combinator, Pear VC, Lightbank	Confirmed

Round	Date	Amount	Investors	Status
Total		**~$14.4M disclosed**; CB Insights $14.33M; Simplify $16.8M		Estimated range

- About page also shows Pioneer and Soma Capital logos.
- Revenue: Not disclosed beyond $1M ARR milestone; ~900% growth FY2024 (Vendor claim).
- Valuation: Not found.
- No 2026 round found. Based on typical 18–30 month runway, a new raise around late 2026–2027 is likely (inference).

Products

Module	Function
AI Scheduling	Patient–clinician matching; adapts to cancellations; office-led or clinician-led; inputs include traffic, credentials, patient needs, geography
Route Optimization	Optimized daily routes; live re-routing
Real-Time Visibility	Clinician location, adherence, coverage gaps
Patient Engagement	SMS and voice reminders, live ETAs, confirmations
Clinician mobile app	Field-staff app
Operations dashboard	Office view
Developer APIs	Public docs at developers.axlehealth.com
Advanced scheduling module	Complements EMR “without changing downstream workflows”

- Integrations named: Epic, athenahealth, WellSky, Statewise, Netsmart. HCHB appears in a testimonial. Axxess, MatrixCare, KanTime: Not found.
- Cityblock deployment used Axle API and “custom integration platform”; clinicians kept documenting in EMR.
- Pricing based on estimated customer savings; dedicated implementation manager per customer.
- Patent status described both as “patented” and “patent-pending.”
- No intake/referral module. No hospice-specific workflows.
- Generative-AI and voice engagement promised May 2025: shipped status Not found.
- Discontinued: in-home testing / visit services (2023).

Customers

- Cityblock Health (17%+ clinician productivity gain over three months, case study), Penn Medicine, Imagine Pediatrics, Grand Care.
- Site-wide claims (Vendor claim): 32% driving savings, 55% fewer missed visits, 70%+ less manual scheduling.

Security

- Claims SOC 2 Type II and HIPAA (independent audit), pen testing, SSO/SAML, role-based access. Trust portal: security.axlehealth.com. Status page: status.axlehealth.com.
- HITRUST: Not found.

Observations

- Most developed scheduling/routing engine and integration layer of the three; only one with public APIs.
- Directly relevant to the capacity and scheduling initiative.
- Customer base is value-based care, health systems and pediatrics — not certified hospice chains. Compassus would likely be its largest home health/hospice deployment: more influence on roadmap, more implementation risk.
- Hospice and home health rules (OASIS, LUPA thresholds, IDG, on-call) unproven.
- Small, flat team; may be fundraising during a build.
- Minor inconsistencies in public figures (seed amount, patent status).

Overlap between vendors

- Scheduling is the only area where products compete directly: VitalisCare Sync vs. Axle Health.
- Otherwise the products do not overlap: hospice clinical-operations prediction (VitalisCare), administrative AI agents (Arya), field scheduling and routing (Axle).

Due-diligence questions

For all three vendors

- Exact legal entity, state/country of formation, EIN — verify against registry records.
- SOC 2 Type II report (date, auditor, scope) and BAA naming the contracting entity.
- Full subprocessor and LLM list; where PHI is hosted and processed.
- Data ownership and model-training terms — does Compassus data train models used for other customers?
- IP ownership and licensing for co-built features.
- Financial statements, runway, cap table.
- Reference calls with a hospice or Medicare home health customer running HCHB.
- Re-validation of outcome claims on Compassus data before scale-up.
- Litigation history (no court search was run for this report).

VitalisCare

- Which entity contracts and signs the BAA: VitalisCare Ltd. (Israel), Integralytic, or a US entity?
- Formal ownership link between VitalisCare Ltd. and Integralytic.
- Do Israel-based staff access PHI? Under what controls?
- How does the HCHB integration work (API, partner program, RPA, flat files)? Is Vitalis an official HCHB partner?
- Validation method behind Vantage 94% accuracy and the 67% comparator. Willing to back-test on Compassus data?
- Which drive-time figure is correct: 55–65% or 30%?
- Staff dedicated to Vitalis vs. shared from the studio. Who are the CTO and clinical lead?
- What happens to co-built IP if the studio spins it out?
- CEO succession, given roles across multiple companies.
- Any capital raised, including Israeli grants?
- Home health product (OASIS, PDGM) on the roadmap?

Arya Health

- Legal entity and EIN; did “Arya, LLC” convert to a corporation?
- Written confirmation of no relationship to Yuvo, Inc. (formerly “Arya Health, Incorporated”).
- Is there a production HCHB integration? Read-only or read/write? API or RPA? Which EMRs are live?
- Which post-acute providers invested in the Series A? Any Compassus competitors?
- CTO and board members.
- Are Bland AI, n8n, Supabase and the LLM providers covered by BAAs?
- Maturity of Intake and Front Desk skills; who were the design partners?
- Any hospice-specific workflows or hospice references?
- Current ARR and runway.
- Renewal, price-increase and integration-billing terms.

Axle Health

- Legal entity name and state; why no Form D under “Axle Health”?
- Is Connor Hailey still with the company? Who is the CTO?

- How many HCHB customers live in production? Does the integration read and write visits? Was the HCHB testimonial one customer or several?
- Can it encode hospice visit frequency, IDG, on-call dispatch, and LUPA thresholds?
- Can it scale to thousands of clinicians?
- Has the generative-AI / voice patient engagement shipped?
- Patented or patent-pending? Patent number.
- Correct seed amount and lead investor.
- Current ARR, runway, and 2026–27 fundraising plans.
- How the savings baseline is defined for ROI-based pricing.
- SLAs and uptime history (status.axlehealth.com).

Recommended next steps

1. Resolve legal entity for each vendor before any BAA or NDA exchange.
2. Request SOC 2 Type II reports and subprocessor lists.
3. Request HCHB integration technical documentation and live HCHB customer references.
4. Run a paid pilot (2–3 months) against a pre-agreed KPI baseline before any build agreement.
5. Run a court-records and UCC lien search on each entity.
