2 Roadmap, no date	1 Touches one corner	0 Not answered

FLAGS, BANDS

A2	Customers, scale and references	80–100	Advance
A3	Measured impact	65–79	Consider
C6	What happens when their product is down	50–64	Hold
		Under 50	Decline

These three raise a flag rather than moving the score. A vendor can score well and still carry one. We resolve it before advancing rather than trading it against points.

Sophistication and clinician fit pull in opposite directions on purpose: a product that decides everything scores high on one and low on the other. That is the real trade in this purchase. A vendor strong on both has solved something hard.

Under 12 on Home Care Home Base shows as Conditional whatever the total.
