

The Scoring Guide

Every part is *a percentage times a budget*.

One exception, on purpose: HCHB integration is a checkbox ladder, not a judgement — so the priority cannot drift.

THE FIVE PARTS		100 points
1	HCHB Integration A1	25
2	Scope Footprint Section B + C	30
3	Sophistication Section C · A2 · A3	20
4	Clinician & Adoption Section D	10
5	Partnership Section E	15

TOTAL100

1	THE HCHB LADDER	tick one, from A1
25	Live, bi-directional, multi-customer More than one customer, reads <i>and</i> writes, published API / HL7 / FHIR, dated.	
20	Live, single customer or one-way In production — but one customer only, or it reads without writing back.	
12	Live via a partner or a brittle method Third party, flat file, direct database, or screen automation.	
6	In development, dated Building, with a committed date in the answer.	
2	Roadmap, undated Named as intent. No date, no commitment.	
0	None, and no path No integration and no credible route to one.	

2	SCOPE FOOTPRINT	41 elements · 30 points
THE ENVELOPE Capacity Management 11 elements · 10 points		
5	Workforce supply	
3	Availability & reach	
3	The capacity math	
FILLING THE ENVELOPE Scheduling Engine 14 elements · 10 points		
4	Demand	
5	Matching	
3	Routing & the week	
2	Exceptions	

MAKING IT HAPPEN Engagement 16 elements · 10 points		
2	How this should run	
6	Before the visit	
4	When plans change	
1	Incentives & offers	
3	Across the care team	
Covered	1.0	Partial0.5—0
Does it today. Stated plainly, or walked through in Section C.	Adjacent, configurable, by a partner, roadmapped — or claimed with no detail.	Absent, out of scope, or done by a person in their model.

3–5	THE TWELVE ITEMS	each on the ladder
3	Sophistication S1 Automation posture How much runs without a person? S2 Decision depth Does it reason, or display? S3 Readiness & rules Ordered, but not yet schedulable. S4 Recovery Found, offered, filled — how fast? S5 Enterprise trust Uptime, outage, commitment, scale.	20 pts · ladder × 5
4	Clinician & Adoption D1 What the clinician decides Change, approve, or locked. D2 Decide or advise And how far a customer can move it. D3 Adoption evidence Six months of it, or an assertion.	10 pts · ladder × 3
5	Partnership P1 Sharing in the value Structure and terms, or enthusiasm. P2 Deployment & change Including the resistance story. P3 What we did not ask Do they see it better than we asked? P4 What they chose not to build Product judgement and candour.	15 pts · ladder × 4

THE EVIDENCE LADDER	parts 3, 4 and 5
0	Not addressed Skipped, or answered without answering.
1	Asserted They say they do it. Nothing behind it.
2	Described We can picture the feature.
3	Mechanism We can picture <i>how it decides</i> — inputs, logic, configuration.
4	Proven Mechanism plus evidence: numbers, a named customer, a period, a baseline.

BANDS	
Advance	80–100
Demo, references, deeper diligence.	
Consider	65–79
Only if a differentiator justifies it.	
Hold	50–64
Park unless the field thins.	
Decline	< 50
Close out with thanks.	

Conditional — HCHB under 12 Any band, but advancing means naming what we accept: an integration to be built, on their timeline, at our risk. Ties break on HCHB, then Scheduling.

NOT SCORED	and often decisive
★	Differentiators Three to five lines. Against the field — and against our own thinking.
🚩	Flags Red is a stop-check. Yellow is a watch. Carried beside the score, never buried inside it.
?	Unknowns What they did not answer. It scores zero, and it becomes the demo agenda.
